Satisfaction  
Guaranteed

**We Use Special GRANULATED Fertilizer in ALL Applications.**

Visit our website for more detailed explanations of your 6 Applications.

- #1** Your first visit will promote early green up along with crabgrass prevention and TARGETED weed control. Your lawn will have a thorough inspection to address any new or old concerns.
- #2** This will provide a deeper green color and strengthen your root system, which only GRANULAR fertilizer can do.
- #3** This will strengthen your lawn while controlling those pesky weeds. Our formula gives you that monthlong slow release for a stronger root system. **A Grub Preventative Treatment will be applied at this time to ensure white grubs do not devastate your lawn for NO ADDITIONAL CHARGE.**
- #4** During this application we evaluate your lawn's specific needs; address any concerns at no expense to you.
- #5** Targeted weed control is also applied at no additional cost.
- #6** Prior to your lawn going into winter dormancy we will apply our specially formulated winter granular to help deep feed your root system for the long winter ahead.

**LAWN PROGRAM · 6-Application Program**
